

# SATLEJ SUNIL

## Full Stack Developer · MERN / Next.js / TypeScript

Dubai, UAE · [satlej.portfolio@gmail.com](mailto:satlej.portfolio@gmail.com) · [linkedin.com/in/satlej-sunil](https://www.linkedin.com/in/satlej-sunil) · [github.com/ssatlej](https://github.com/ssatlej)

### SUMMARY

Full-Stack Developer with 3+ years of experience building high-performance, production-grade web applications using React.js, Next.js, TypeScript, Node.js, Express.js, MongoDB, and PostgreSQL. Proven track record designing and implementing secure, scalable RESTful APIs, integrating fintech payment systems (Stripe, Tabby, PayBy), and working with B2B APIs for real-time pricing and booking updates across flights, hotels, and visa services. Experienced with multi-tenant SaaS architecture, CRM systems, and Google My Business integration and data synchronization. Comfortable owning projects end-to-end — frontend, backend, and production infrastructure — including server management with Nginx and deployment on AWS and Hetzner Cloud. Holds a Bachelor of Technology in Computer Science and Engineering from CUSAT.

### TECHNICAL SKILLS

|                      |                                                                                                                              |
|----------------------|------------------------------------------------------------------------------------------------------------------------------|
| Core                 | React.js, Next.js, Node.js, Express.js, Nest.js, TypeScript, JavaScript, HTML5, CSS3                                         |
| Databases & APIs     | PostgreSQL, MongoDB, MySQL, RESTful APIs, Socket.IO                                                                          |
| Architecture & Infra | MVC, Nginx, AWS, AWS EC2, Hetzner Cloud, Docker, Redis, DevOps Practices, Git, GitHub, Linux, SSL/TLS                        |
| Payments / Fintech   | Stripe, Tabby, PayBy, PCI DSS compliance, webhook retry handling                                                             |
| Integrations         | Ratehawk Hotels, Hotelaat Hotels, Fluxir Visa Services, Seeru Flights, SendGrid, Google My Business, IVR, Just Dial, Sulekha |
| UI/UX & Styling      | Tailwind CSS, Bootstrap CSS, Material UI, SCSS, Figma, Vite                                                                  |
| Performance & SEO    | Page load optimization, code splitting, SEO best practices, accessibility, responsive design, server-side rendering          |
| Security             | Web Cryptography API, AES-GCM encryption, authentication/authorization, multi-tenant data isolation                          |
| AI-Native Workflow   | Cursor, Claude Code, Codex, Devin, AI proxy/chatbot integration for customer support                                         |
| Internationalization | Arabic–English localization, LTR/RTL bidirectional layout support                                                            |

### EXPERIENCE

Software Developer (MERN with DevOps) — Jadwelny

Dubai, UAE · Apr 2025 – Present

- Stack:** React.js, Next.js, Node.js, Express.js, Nest.js, PostgreSQL, MongoDB, TypeScript, REST APIs, Nginx, Linux, Stripe, Tabby, PayBy, Hetzner Cloud, AWS EC2, Docker, Redis
- Led end-to-end development of a high-traffic, real-time travel booking platform, handling frontend, backend, and production infrastructure independently.
  - Designed and implemented scalable RESTful APIs using Node.js and Express.js, supporting booking workflows, external integrations, and real-time data processing.
  - Built a high-performance Next.js frontend with focus on SEO, page load optimization, and responsive user interfaces.
  - Built scalable and reusable UI components, dynamic forms, and interactive dashboards to support complex booking workflows and business logic.
  - Integrated fintech payment systems (Stripe, Tabby, PayBy), ensuring PCI DSS compliance, and handling transactions, webhooks, retries, and failure scenarios.
  - Integrated multiple B2B APIs (hotels, flights, visa services) for real-time pricing, availability, and booking operations.
  - Used Redis for caching and session management, reducing database load and improving API response times on high-traffic endpoints.
  - Developed an internal CRM system including dashboards, workflows, and reporting tools to enhance business operations and staff productivity.

- Implemented Arabic–English localization with full LTR/RTL bidirectional layout support, ensuring a consistent booking experience across both languages.
- Deployed and maintained production systems on Hetzner Cloud and AWS EC2 using Nginx, Linux, and SSL/TLS, ensuring reliability and scalability.
- Containerized services using Docker to standardize environments and simplify deployment across development and production.
- Built and integrated an AI proxy/chatbot for customer support, handling booking-related queries and reducing manual support load; adopted AI-integrated IDEs (Cursor, Claude Code, Codex, Devin) to accelerate development and code review.

### Full Stack Developer (MERN) — SRV IT Hub Private Limited

Kannur, Kerala, India · Nov 2023 – Feb 2025

**Stack:** React.js, Next.js, Node.js, Express.js, MongoDB, PostgreSQL, TypeScript, REST APIs, AWS, Nginx, Material UI, Bootstrap, CSS/SCSS

- Developed and maintained multiple end-to-end web applications and SaaS platforms, covering frontend, backend, and deployment.
- Led development of backend architecture, APIs, and infrastructure for multiple SaaS platforms and high-traffic web applications.
- Built server-rendered Next.js applications with strong focus on SEO optimization, performance, and server-side rendering.
- Developed interactive dashboards, analytics views, and dynamic forms to support business workflows and data-driven decision making.
- Implemented a multi-tenant architecture with secure data isolation and scalable backend systems for multiple clients (single-server, multi-database design).
- Configured and deployed applications using Nginx and AWS, implementing best practices for security, testing, and production readiness.

### Project: SRV Social (SaaS CRM Platform) — solely developed

- Designed full system architecture including Admin CRM and Client CRM modules; built multi-tenant backend and frontend architecture with dynamic dashboards for client management and analytics.
- Integrated Google My Business and Meta APIs for automated review management and insights.

### Project: ASAP Kerala (Kerala Government Initiative)

- Developed full-stack features supporting over 6,000 leads within six months, including assessment, ranking, and certification modules with rank generation and secure data processing.

### Project: SMOTPRO (Website + CRM System)

- Built Sales, Marketing, and HRMS modules across frontend and backend; integrated Just Dial, IVR, and Sulekha, supporting 500+ leads per week and improving operational efficiency by over 50%.

## FREELANCE PROJECT

### SECUES — Secure File Sharing and Viewing (*secues.com*)

Jan 2025 – Feb 2025

- Developed a secure and interactive web application using React.js, Vite, and Tailwind CSS, delivering a highly responsive UI.
- Engineered a secure file-sharing system with server-generated share IDs and a PHP-based API with optimized request handling.
- Implemented end-to-end encryption using the Web Cryptography API and AES-GCM, ensuring data integrity, confidentiality, and protection against unauthorized access.

**Stack:** React.js, Vite, Tailwind CSS, TypeScript, Web Cryptography API, AES-GCM, PHP, Hyperhost

## EDUCATION

**Bachelor of Technology, Computer Science and Engineering — CUSAT** (Cochin University of Science and Technology), Kochi, Kerala, India Jul 2019 – May 2023 · CGPA: 8.0
